Model : 8011 Series Blender without Timer

- capacity : 1liter / 1.2 Liter
- Switch setting : 2
- Speed : 18000 - 22000 RPM
- Base : Epoxy Coated Motor Housing
- Container : Available container with handle & Lid
- 8011S - Stainless Steel Container
- 8011G - Glass Container

Model : 8010 Series Blender with Timer

- capacity : 1liter / 1.2 Liter
- Switch setting : 2
- Speed : 18000 - 22000 RPM
- Timer : 60 seconds mechanical timer
- Base : Epoxy Coated Motor Housing
- Container : Available container with handle & Lid
- 8010S - Stainless Steel Container
- 8010G - Glass Container

Model : 800 Series Blender

- capacity : 1liter / 1.2 Liter
- Switch setting : 2
- Speed : 18000 - 22000 RPM
- Base : Epoxy Coated Motor Housing
- Container : Available container with handle & Lid
- 800S - Stainless Steel Container
- 800G - Glass Container

Model : LB20 Series Variable Blender

- capacity : 1liter / 1.2 Liter
- Switch setting : Variable
- Speed : Torque 500 - 20000 RPM
- Base : Die-cast, Epoxy Coated Motor Housing
- Container : Available container with handle & Lid
- LB20ES - Stainless Steel Container
- LB20EG - Glass Container

Model : CB15 Series Food Blender with Electronic Keypad

- capacity : 4 Liter
- Switch setting : 3-speed plus Pulse Electronic Membrane Keypad
- Base : Epoxy Coated Motor Housing
- Container : Available container with two handle & Lid
- CB15E - Stainless Steel Container
- CB15TE - Stainless Steel Container with timer 3 minutes
- CB15VXE - Stainless Steel Container with adjustable speeds, built in RPM display

Model : TBB Series Commercial Blender

- capacity : 1.5 Liter
- Switch setting : Toggle / Electronic / Variable Speed control
- Speed : 1000 - 17000 RPM, Pulse max 24000 RPM
- TBB145E - Toggle Switch control
- TBB160E - Electronic Touchpad controls with 60 seconds timer
- TBB175E - Electronic Touchpad controls with Variable speed control

Model : MX Series HI POWER Blender

- capacity : 2 Liter
- Switch setting : 2
- Speed : Paddle Switch with Pulse
- Container : BPA-Free Copolyester container with handles
- MX1000TX - Paddle Switch with pulse
- MX1100TX - Electronic with Pulse Timer
- MX1200TX - Variable Speed
- MX1050TX - Electronic Touchpad
- MX1500TX - Reprogrammable, Adjustable Speed control with sound enclosure

Model : WFP16SCDE Food Processor

- 2 peak input HP commercial motor
- Die-cast housing
- 3.75-liter, unbreakable, clear-view batch bowl with LiquiLock® Seal System
- Continuous-feed chute for large-volume processing
- ON, OFF and PULSE push-button controls

Model : WFP14SE Food Processor

- 1 HP motor
- 3.3-liter, unbreakable, clear-view batch bowl with LiquiLock® Seal System for processing liquids
- Easy ON, OFF and PULSE control paddles
- Extra-large feed tube and pusher

>> General Laboratory >> Ultrasonic Cleaners

Efficient and User-Friendly Ultrasonic Cleaner for Dental and Surgical Instruments

This ultrasonic cleaner is designed to operate at maximum efficiency regardless of water levels. It has an inbuilt protective mechanism against thermal shock and empty tank operation, ensuring reliable and safe use. The touch control keypad and display make it easy to use, with a programmable silent key press for the countdown timer, water temperature, and power level.

Using ultrasonic technology, this cleaner delivers precise and thorough cleaning, making it the most effective method for removing fine foreign soil from crevices and all areas of dental and surgical instruments. Additionally, it can remove stubborn soil and blood contaminants without damaging the instruments. Compared to conventional cleaning methods, this ultrasonic cleaner can clean in a fraction of the time, reducing overall operational and running costs.

Digital Benchtop Ultrasonic Cleaners

Model	Bath Size (mm)	Capacity (L)	Unit Size (mm)	PSP (watts)	Heater (watts)	Net Weight (kg)

LABCONCO

FreeZone 2.5 Liter -50C / -84C Benchtop Freeze Dryers

FreeZone 2.5 Liter Benchtop Freeze Dryers are designed for lyophilizing light sample loads. The compact design is ideal for labs with limited floor space. The upright stainless steel collector coil holds 2.5 liters of ice before defrosting.

- A single 1/3 hp HCFC/CFC-free refrigeration system cools the collector to **-50° C (-58° F)**, suitable for aqueous samples.
- Two 1/3 hp HCFC/CFC-free refrigeration systems cool the collector to **-84° C (-119° F)**, suitable for samples with low eutectic points including acetonitrile.

FreeZone 4.5 Liter -50C / -84C / -105C Benchtop Freeze Dryers

FreeZone 4.5 Liter Benchtop Freeze Dryers are designed for lyophilizing light to moderate sample loads. The compact design is ideal for labs with limited floor space. The upright stainless steel collector coil holds 4.5 liters of ice before defrosting.

- A single 1/3 hp HCFC/CFC-free refrigeration system cools the collector to **-50° C (-58° F)**, suitable for aqueous samples.
- Two 1/3 hp HCFC/CFC-free refrigeration systems cool the collector to **-84° C (-119° F)**, suitable for low eutectic point samples including acetonitrile.
- Two 1/2 hp HCFC/CFC-free refrigeration systems cool the collector to **-105° C (-157° F)** at 60 Hz or **-102° C (-152° F)** at 50 Hz, suitable for low eutectic point samples including acetonitrile and dilute methanol and ethanol.

Lyo-Works™ OS provides a real time display of collector temperature, vacuum level and optional End-Zone™ end point detection system, shown on a 5" full color, capacitive touchscreen. Models with PTFE-coated collectors that can withstand corrosive compounds are available.

- **Stay Connected**
- **View Real-Time Sample Data**
- **Get Consistent, High Quality Results**
- **Make Challenging Samples Easy**

Laboratory Glassware Washers

Labconco glassware washers are designed with specialized features to provide superior cleaning, meeting the demands of laboratories.

SteamScrubber Glassware Washers

SteamScrubber Glassware Washers are designed to wash and dry a wide variety of wide-mouth and general purpose labware. Utilizing a brilliant 5" touchscreen display featuring CleanWorks OS, users have full control of wash parameters and washer settings. Able to reach a maximum wash temperature of 93° C (199° F), stubborn contaminants are easily removed. Heated air is forced into the chamber, effectively drying glassware to completion.

FlaskScrubber Glassware Washers

Designed for narrow-neck glassware such as volumetric and Erlenmeyer flasks. A lower spindle rack with 36 spindles (included) uses direct injection to clean labware inside and out. Optional specialized inserts to wash pipettes, BOD bottles, petri dishes, culture tubes, utensil, etc. are available.

FlaskScrubber Vantage Series Glassware Washers

FlaskScrubber Vantage Series Glassware Washers have specialized features for contamination-sensitive research. They are designed to wash and dry narrow-neck and general purpose glassware. Able to reach wash temperatures up to 93° C (199° F) which can remove lipids and sanitizes glassware.

MK350S Premium

MK350S Premium is a full-featured Handheld Spectrometer used by lighting professionals with wide ranging projects and lighting challenges.

MK350N Premium is the right fit

Practical, precise and abundant in essential features
The MK350N Premium, our popular mid-range spectrometer, is made for professionals who want top spectrometer performance without the need for specialized niche features

PG200N Spectral PAR Meter

The PG200N is a Spectral PAR meter used to measure the quantity and quality of light for a new generation of indoor farmers who use artificial lighting as a substitute or complement to sunlight.

MK550T Handheld Spectroradiometer

With the MK550T handheld spectroradiometer, anyone has access to cost-effective, lab-level instrumentation that can measure more than 10x faster than other precision instrumentation.

EdvoCycler™ Jr. Personal PCR Machine

The EdvoCycler™ Jr. Personal PCR Machine is the newest member of our PCR family and is based on the advanced EdvoCycler™ 2 platform. The sleek form factor has been miniaturized with 16 wells to run individual PCR experiments. A vivid and intuitive touchscreen and onboard computer simplify operation by not requiring a secondary device.

QuadraSource™ Power Supply

Power any combination of EDVOTEK® electrophoresis units with this mighty power supply! Features an easy-to-use, full programmable interface for setting voltage, current or timer control with each parameter displayed in real-time. Programs may be paused or resumed at any point.

EdvoCycler™ 2 Classroom PCR Machine

The successor to the bestselling EdvoCycler™ has been redesigned with improved PCR technology to be the best value among classroom thermal cyclers. The EdvoCycler™ 2 doubles the capacity of the original at 48 wells and features an intuitive touchscreen.

SD Basic Spray Dryer

- A simple and effective entry-level laboratory scale spray dryer. As at home in Universities for training as it is in research and development facilities.
- Efficient, accurate PID control
- Aqueous-based solution processing
- Designed specifically for training, research, and pre-production trials
- Created with simplicity in mind – basic, simple and straightforward to use
- Optional deblocking upgrade available, which clears the atomiser autonomously without supervision

SD 06 Spray Dryer

- The perfect all-in-one research solution, capable of running both aqueous and solvent-based solutions.
- Efficient, clear touchscreen
- PLC controlled
- Capable of running aqueous and solvent-based solutions
- Spray drying of temperature-sensitive products
- Easily adaptable for dual cyclone high-yield use
- Automatically unblocks atomiser
- A chemically resistant 316-grade stainless steel casing
- IP65 rated

SPRAY DRYER FEATURES

- Reliable and maintenance-free
- Setup and run in under 10 minutes
- Customizable features, including the Automatic DeBlocking upgrade for the SD-Basic Spray Dryer
- Borosilicate glass shows the status of the Spray Drying process
- All Spray Dryer Machines have a proven performance with thousands of machines globally used
- Quick lead-times for staple accessories and glassware for UK and European customers
- Designed for research, training, and pre-production trials
- For Mainland England customers, LabPlant staff may be able to deliver and provide assistance during the first run
- Horizontal Spray Dryer design – streamlined for use

APPLICABLE PRODUCT USES

- Ceramics & Advanced Materials
- Dairy Products
- Flavourings
- Food and Beverages
- Heat Sensitive Materials
- Milk & Egg Products
- Perfumes
- Pharmaceuticals and Health-Research
- Plant & Vegetable Extracts
- Plastics and Polymers, Resins and Oxides
- Soaps & Detergents
- Spray Drying Plant Based and Agricultural Products

Fume Hood & Enclosures

Discover the perfect laboratory fume hood solution for your unique needs from Labconco, one of the world's leading fume hood manufacturers. We offer extensive range of chemical fume hoods to support diverse applications:

- Chemical fume hoods - safeguards your laboratory environment with unsurpassed chemical containment features
- Ductless fume hoods - Offering flexibility, efficiency, and exceptional air filtration capabilities
- Floor-mounted fume hoods - Combine optimal ventilation with a spacious interior for your application
- Special Application Fume Hoods - PVC and stainless steel hoods for use with perchloric acid, acid digestion, radioisotopes. Or ask about custom chemical containment solutions.

Biological Safety Cabinets & Enclosures

Labconco offers biosafety cabinets appropriate for all biosafety level environments. Type A2, B2 and C1 Class II biosafety cabinets can accommodate BSL-2, BSL-3 and BSL-4 (with appropriate PPE), and Purifier Class I biosafety enclosures offer BSL-2 protection for applications that do not require product protection.

Purifier Logic+ Class II, Type A2 and Type B2 biological safety cabinets provide personnel, product and environmental protection from hazardous particulates. Type A2 cabinets recirculate HEPA filtered air, and Type B2 biosafety cabinets duct 100% of filtered air to the exterior.

Compliance

- ETL listed
- NSF International listed
- ADA-compliant (height of controls and receptacles)
- CE Conformity marking (230V models)
- ISO 5 conditions per ISO 14644-1 and 2
- Available size 3,4,5 & 6 feet width

Protector Filtered Glove Boxes

Protector Filtered Glove Boxes provide inlet and outlet HEPA or ULPA filtration and a leak-tight physical barrier to protect the operator from exposure to potentially hazardous materials.

These glove boxes feature particulate containment <20 nanograms per cubic meter as confirmed by Safebridge Consultants, Incorporated and also meet ISO Class 3 standards.

- Operating range up to 50 m diving depth
- Internal PAR sensor
- Red or blue plus far-red light

JUNIOR-PAM

Teaching Chlorophyll Fluorometer

- Optimized for classroom teaching by small size and ease of operation.
- Controlled and powered by PC via USB line.
- WinControl-3 software for basic and advanced experiments.
- Quantity discount for internship equipment

MINI-PAM-II

Photosynthesis Yield Analyzer

- Compact housing with integrated computer
- Internal PAR sensor
- Red and blue light versions, both including far-red light

LEAF-STATE-ANALYZER

Radiation Screening

- Measures protection against the particularly harmful UV-B radiation
- Probes screening at four wavebands: UV-B, UV-A, blue, and green
- Provides the stress factors chlorophyll content and photosystem II damage

APIEZON®

Apiezon AP100 Grease

Apiezon AP100 vacuum grease is silicone-free with PTFE, providing high lubricity. It offers eight times more lubrication than standard greases. Suitable for ambient temperatures, consider Apiezon AP101 or H Grease for higher temperatures.

Apiezon AP101 Grease

Apiezon AP101 is a versatile, silicone-free hydrocarbon grease for industrial and scientific use, with anti-seize properties for glass and metal surfaces, containing PTFE for long-lasting lubrication and protection.

Apiezon H Grease

Apiezon H Grease is a silicone-free high vacuum grease with superior 'stiction' and thermal conduction properties, suitable for high-temperature applications in scientific and industrial environments. It is approved by BAE Systems, the European Space Agency, and NASA.

Apiezon L Grease

Apiezon L Grease is a silicone and halogen-free ultra-high vacuum grease preferred by organizations such as The European Space Agency, NASA, and NATO. It has the best vapor pressure properties among Apiezon products and is ideal for ultra-high vacuum applications at ambient temperatures.

Apiezon M Grease

Apiezon M Grease is a silicone and halogen-free high vacuum grease suitable for various high vacuum applications and also used in scientific and industrial settings. It is approved for NATO use and works best at ambient temperatures. For higher temperature applications, consider Apiezon AP101 or Apiezon H Grease.

Apiezon N Grease

Apiezon N Grease is silicone-free and widely recognised and recommended as the cryogenic vacuum grease of choice. This cryogenic grease is specially formulated to exhibit craze-free performance characteristics at low temperatures and withstand frequent cycling between cryogenic temperatures as low as -273°C and +30°C.

Apiezon T Grease

Apiezon T Grease is a silicone-free medium temperature vacuum grease renowned for its quality and tenacity. Apiezon T Grease has gained approval from prestigious organisations including NATO and the US Navy.

Apiezon PFPE 501 Grease

Apiezon PFPE 501 vacuum grease is a chemically inert, high temperature lubricant. With an upper operating temperature of 250°C and vapour pressure of 1.3×10^{-12} at 25°C, it is robust, versatile and can be used for sealing and lubricating under the most extreme operating conditions. This includes environments where aggressive chemicals and strong oxidising agents are regularly used.

>> Cleaning Solution

For over 75 years, Alconox has been the recognized leader in detergents, used extensively in the laboratory, pharmaceutical, biotech, medical device, healthcare, electronics, solar, food, nuclear, optics, cannabis and cosmetics industries. The aqueous detergents and cleaners span the range from acidic to neutral to alkaline, low and higher foaming, powder and liquid concentrates, phosphate and phosphate-free, to meet virtually any critical cleaning challenge.

New packaging

Tergazyme®
Enzyme-Active Powdered
Detergent

Citranox®
Acid Cleaner and Detergent

>> Water Purification System PURITE

Purite Remote Dispenser

Ultrapure water at your fingertips
The Purite Remote Dispenser is a part of our bench-top water purification range delivering ultrapure water directly at your lab workstation. This state-of-the-art 'satellite' dispenser can be conveniently and discreetly positioned anywhere on a bench saving valuable lab space and eliminating the need to reach out to the main RO system.

Purite Labwater

Purite Labwater deionisers
Type II / Deionised (DI) water
The Purite Labwater is a simple, cost-effective option for producing low volumes of purified water between 1 and 10µS/cm on-demand. Purite Labwater units can easily be wall-mounted and are simply connected by a conventional hose to a laboratory tap. They operate under standard water pressure, so no additional parts are required.

Purite Mini Pure Water Boost Pump

For clinical laboratory water
The Purite Mini Pure Water Boost Pump is designed for use with a wide range of laboratory equipment, providing a consistent flow of pressurised water. Typical applications range from glass washers and environmental chambers, to humidity cabinets and autoclaves.

Purite Fusion

For clinical laboratory water
Type I / Ultrapure water (UPW) water
The Purite Fusion is a self-contained water purification unit that delivers a flow of purified water to a consistent quality of 18MΩ.cm. It is ideal for the most demanding laboratory processes including life sciences, such as histology, cell and tissue culture, DNA sequencing and IVF.

Purite Analyst

For clinical laboratory water
Type II / Deionised (DI) water
The Purite Analyst provides a consistent supply of purified water to a quality better than 1MΩ.cm. It is easy to use and ideal for applications such as glassware rinsing, buffers and stains, reagent make-up, and media preparation.

Purite HP

For clinical laboratory analyser feed
Type II / Deionised (DI) water
Designed for use in laboratory applications, such as HPLC, ion chromatography, atomic absorption, hydrogen generation and clinical analyser feed, the Purite HP produces a consistent flow of purified water to a quality better than 10MΩ.cm.

Purite Neptune Ultimate

For clinical laboratory water
Type I / Ultrapure water (UPW) water
The Purite Select Neptune Ultimate provides a high flow of consistent quality purified 18.2MΩ.cm ultrapure water. The advanced, self-contained unit is ideal for the most challenging laboratory applications, especially analytical and life sciences.

High-quality water is vital in labs for tasks like washing glassware and preparing solutions. Contaminated water can impact diagnostics and instrument efficiency. Maintaining precise water quality is critical for accurate testing and analysis, minimizing errors, and cutting costs.
